

GREENHECK'S

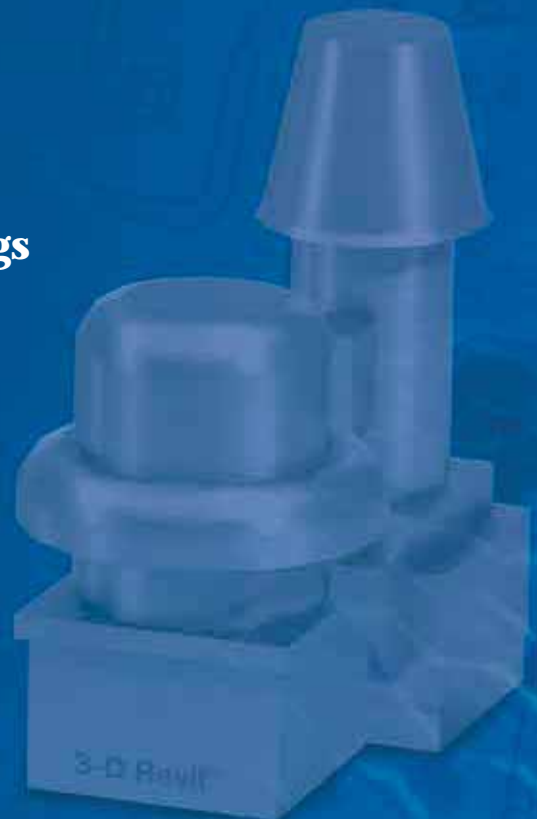

CAPS Program

COMPUTER-AIDED PRODUCT SELECTION AND DESIGN SOFTWARE

Increase Your Efficiency in the Design Process.

- Easy to Use
- Widest Product Selection
- As-Configured
3-D Revit® and AutoCAD® Drawings
- One-on-one Training Available
- No Cost

 **GREENHECK**
Building Value in Air.

CAPS

THE MOST TRUSTED SELECTION SOFTWARE IN THE HVAC INDUSTRY.

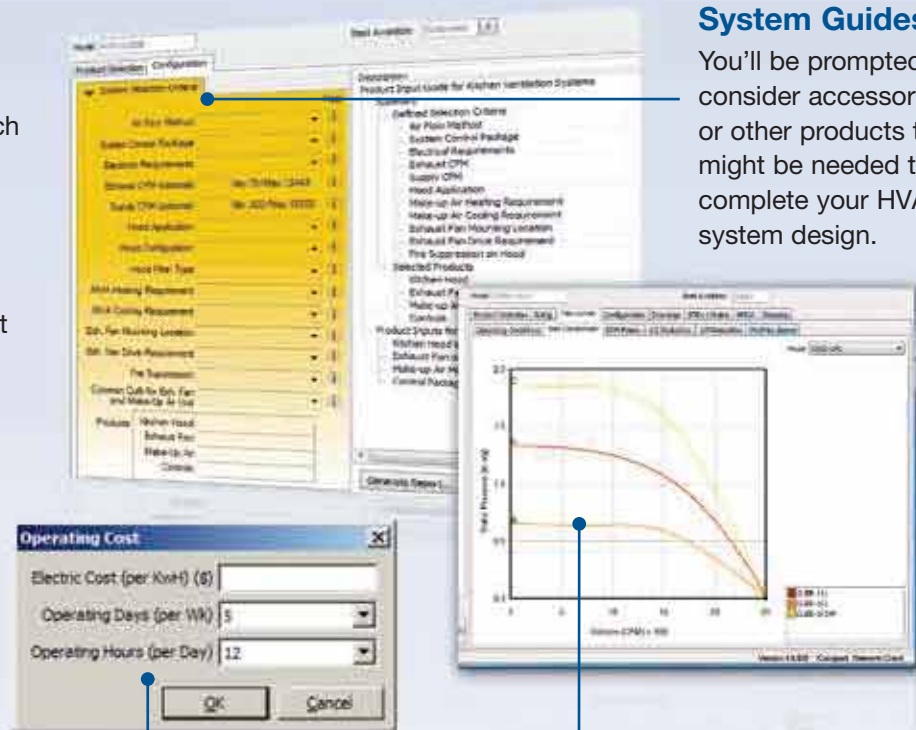

CAPS will save you time when selecting HVAC products. CAPS provides all the relevant and accurate information you need including product selections, sizing, performance data, fan curves, configuration details and economic payback analysis — plus Revit® and CAD drawings just the way you configured them, for your Building Information Modeling (BIM).

Widest Product Offering

- Choose from more than 550 unique models of HVAC air movement products and equipment.
- Design a complete ventilation system without having to search through multiple programs.

User Guides for All Levels of Experience

- CAPS helps you make the right decisions regardless of how experienced you are.
- Typical CAPS users include system designers, drafters, specifiers or design/build specialists.
- CAPS prevents you from making accessory selections that are invalid.
- Helpful hints are always available for clarifications.

System Guides

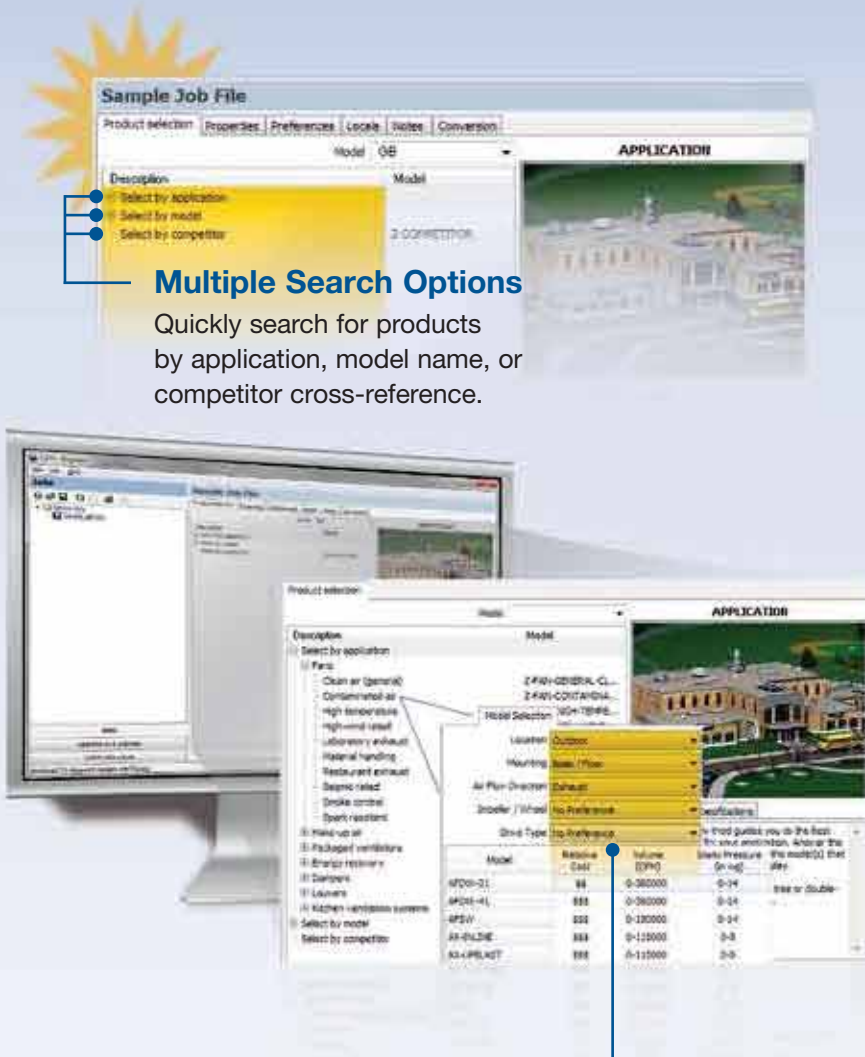

You'll be prompted to consider accessories or other products that might be needed to complete your HVAC system design.

Convenient Comparisons

Compare payback costs resulting from energy savings. Compare performance fan curves to help you choose the right product. Compare relative fan costs and operating costs of various models.

“CAPS makes it very easy to quickly generate product selections and make changes to those selections as the project develops. The interface is very user friendly and intuitive, and the product specific CAD drawings and Revit families save a lot of drafting time. As a whole, it's a great program that really makes things easier for the designer.”

—Matthew Archey
Borton-Lawson
Wilkes-Barre, PA

Multiple Search Options

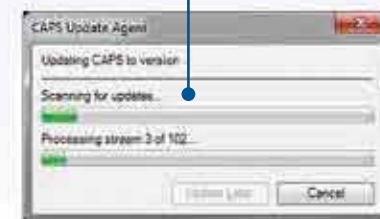

Quickly search for products by application, model name, or competitor cross-reference.

Helpful Wizards

Quickly narrow down your models using one of the application wizards. Zero in on what you need by entering desired criteria such as location, mounting and drive type features.

Automatic Updates

We will automatically update you with new and enhanced products.

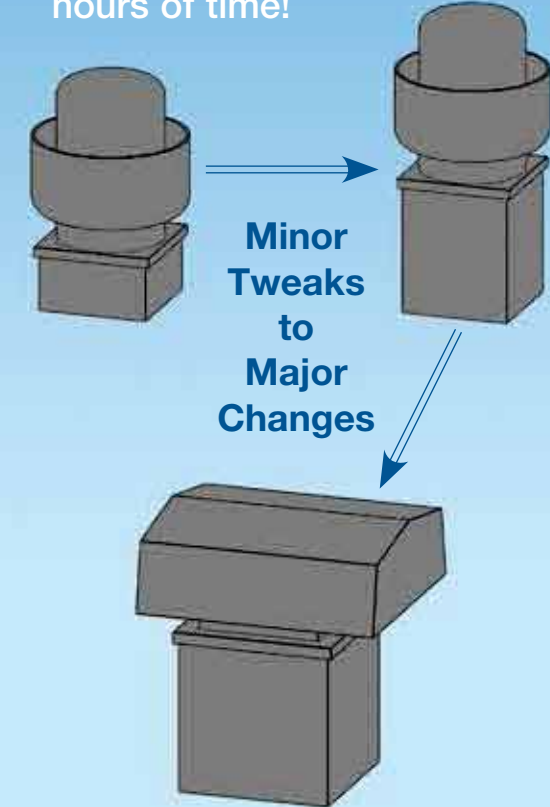

“Greenheck CAPS is user friendly making it easy to select different products, especially for fan applications. CAPS allows for different accessory selections and comparisons between different fans and applications. It also provides a nice schedule for plan and spec applications.”

—Emil Mikle
Bloomsburg University
Bloomsburg, PA

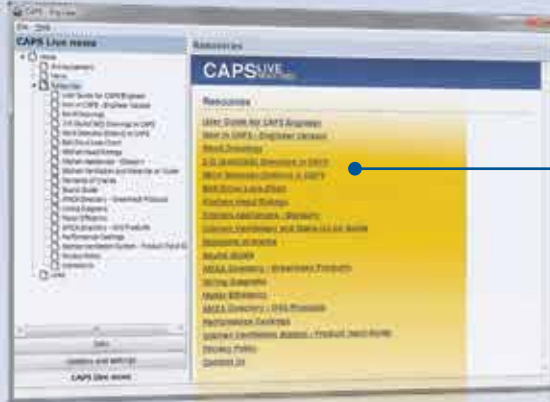

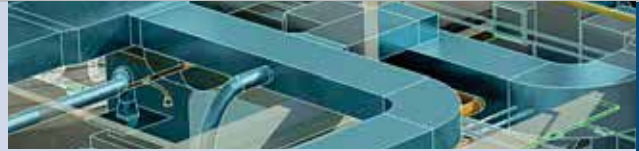

Dynamic Revit® and CAD Content

CAPS is the only HVAC software selection program in the industry to offer “As Configured” Revit® and AutoCAD® drawings — saving drafters hours of time!

Save time when jobs change.

With CAPS, you can take the guesswork out of your Revit® models. The program dynamically updates the as-configured Revit® content. CAPS offers more content than any other product selection software and makes design changes quicker and easier than any other program in the HVAC industry.

Equipment Schedules

Create and export up-to-date, equipment schedules.

CAPS...A Useful Tool From Building Concept to Occupancy

- From an architect's vision and the building owner's desire to offer energy efficient indoor air comfort to the engineer's specifications and the HVAC contractor's final selections, CAPS puts the industry's widest selection of air movement, control and conditioning equipment at your fingertips throughout the building process.
- CAPS makes it easy to share files and collaborate frequently with your local Greenheck representative and other members of your project design team.
- When your building project is finished, product information from CAPS can be provided to building owners, facility managers and maintenance staff. Installation manuals, AutoCAD® drawings and Revit® information can be used to quickly locate parts or troubleshoot system issues.
