

## **Have you heard? Zehnder Rittling Leads the Induction Unit Market!**

*Are you looking for an efficient and quiet HVAC solution for your building?  
Rittling Induction Units might be the perfect fit!*

**Dual Air Streams:** Rittling Induction Units use two airstreams to maintain comfortable conditions. The primary air stream is delivered from central air handlers, while the secondary air stream is room air induced over the water coil within the unit.

**Efficient Air Mixing:** These units blend conditioned outside air with filtered room air, ensuring a constant supply of fresh air and maintaining optimal indoor air quality.

**Energy Savings:** By reducing the required volume of air compared to conventional systems, making them ideal for environments when noise reduction is crucial.

**Quiet Operation:** With no moving parts like fans, these units operate quietly, making them ideal for environments where noise reduction is crucial.

**Customizable Design:** Available in various models and configurations, Rittling Induction Units can be tailored to meet specific heating and cooling needs, whether for office buildings, hotels, or residential spaces.

**Low Maintenance:** The absence of moving parts means lower maintenance requirements. Only occasional cleaning of lint screens is needed to keep the system running efficiently.

**Versatile Applications:** Suitable for perimeter zones of multi-room buildings, these units effectively handle variable heat gains from lights, people, and solar radiation through windows.

***Upgrade your HVAC system with Rittling Induction Units and enjoy the benefits of efficient, quiet, and customizable climate control.***
