**PROJECT OVERVIEW**

The recent renovation of the operating rooms at Northwell Health Glen Cove Hospital is a prime example of innovative design meeting practical solutions. With the collaboration of Price Industries, this project highlights the implementation of advanced ceiling systems tailored to the hospital's specific present & future needs.

**OBSTACLES TO OVERCOME**

One of the standout features of this renovation was the custom 7-inch height Price Ceiling Plenum, specially designed to accommodate the tight ceiling conditions of the existing structure. This solution ensured that the renovation proceeded smoothly without compromising the operational capabilities or aesthetics of the operating rooms.

**PRODUCT HIGHLIGHTS**

The Price Ceiling System installed comes equipped with integral diffusers, a welded grid, and access panels. These features play a crucial role in enhancing patient and staff comfort, ensuring optimal air distribution and ease of access for future modifications and additions. The flexibility and efficiency of this system make it a valuable addition to the hospital's infrastructure.

**CONCLUSION**

The successful renovation of the operating rooms at Northwell Health Glen Cove Hospital stands as a testament to what can be achieved through innovative design and collaborative effort. The custom ceiling solutions provided by Price Industries have not only met the immediate needs of the hospital but have also laid a foundation for future adaptability and growth.
